

Олимпиадные задания для учащихся 9-11 классов

READING (Time: 35 minutes)

Прочитайте тексты и установите соответствие между заголовками 1-8 и текстами A-G. Используйте каждую букву только один раз. В задании есть один лишний заголовок. Занесите свои ответы в таблицу.

- 1. Bad weather warnings
- 2. Calculating weather
- 3. Sports weather
- 4. New information from the space
- 5. The Navy serves the weather
- 6. The power of weather
- 7. Weather prevents new records
- 8. Speedy winds

- A. The Met Office and the Environment Agency are warning the public to be prepared for possible travel difficulties as many areas see 20-40 mm of rain and some areas see up to 80 mm falling by the end of Monday. Steve Willington, Met Office Chief Forecaster said: "A deep area of low pressure is moving North from the Bay of Biscay and will bring a very unsettled kind of weather to all parts of the UK this week. The public should keep up to date with the latest forecast and warnings for their area on our website and with forecasts on TV and radio. Everyone should be prepared for effects of heavy rain and strong winds as they combine to bring the potential for travel problems and localized flooding over the next few days."
- B. Metop-B was launched by a Soyuz Rocket from Baikonur, Kazakhstan, yesterday and once in orbit will collect critical data for weather forecasters, such as the Met Office. Along with its partner satellite Metop-A, it will orbit the Earth from pole to pole at an altitude of around 800 km, taking measurements including temperature, humidity and cloud properties, as well as snow and ice cover, sea surface temperature and land vegetation. EUMETSAT will take over control of the Metop- B satellite from the European Space Operations Centre on 20 September 2012, and will spend around six months checking the performance of the satellite in orbit and validating all data taken from its observations. Once this is completed the Metop-B satellite will be declared operational.
- C. The Royal Navy submarines are to play a potentially important role helping map the effects of climate change deep under water in the world's coldest environment. Very little is currently known about the areas of water beneath the ice of the Arctic as sensors for long-term monitoring are difficult to place. However, submarines, including those based at Devonport, routinely travel through these remote areas and now the information that crews gather will be made available to scientists. Tim Clarke, a marine scientist at the Ministry of Defence's Science and Technology Laboratory, said it would make a big difference. "What this represents is the availability of important scientific data, previously inaccessible, which can only move the study forward", he said.
- D. One of the most famous climbers of all time, Apa Sherpa, who has conquered Everest a record 21 times, says he may not be able to do it again. Why? Because climate change is making the world's highest and most dangerous peak unclimbable. Apa, popularly known as the "Super Sherpa", who first conquered Everest in 1989, told AFP that the absence of snow on the mountain concerns him greatly. He said: "In 1989 when I first climbed Everest there was a lot of snow and ice but now most of it has just become bare rock. That, as a result, is causing more rock falls which is a danger to the climbers".
- E. A major winter storm brought very strong winds across much of the UK on 3-rd of January, 2012. The worst affected area was southern Scotland. In this area, this storm was judged as the most severe for 13 years- since 26-th of December, 1998, with wind speed exceeding those of the recent storm of 8-th of December, 2011. Very strong winds were also experienced across much of England, Wales, and Northern Ireland. This storm was followed by a further extremely windy period from 4-th to 5-th of January, 2012 – with further damaging winds across northern and eastern England. These storms followed a particularly turbulent time of weather from late November to mid- December.
- F. The idea of creating a weather forecast using dynamic equations was first put forward by English mathematician, Lewis Fry Richardson, in 1922. He realized the dynamics of the atmosphere could be

modelled by doing thousands of equations, thus being able to predict the weather. In a pre-computer age, however, the only way to apply his numerical method was by hand. He estimated it would take 64,000 people to perform the calculations needed to make a forecast in time for it to be useful. While this wasn't practical, Richardson's theory formed the basis for weather forecasting as technology improved.

- G. The weather can have a huge impact on sports – from cycling to surfing, cricket to beach volleyball. As the UK's national weather service, we're always there when it matters, applying our science so that people can make the most of the weather. Many sports are affected by the weather in some way and conditions are important to athletes and spectators alike. Sometimes the impact of weather on sport is clear for all to see. It can help or hinder – headwinds make running and cycling harder, while tailwinds help push us forward. Some world records are invalid if set under certain conditions. Most of those participating in indoor sports like squash or badminton aren't too worried, but for sports like hockey or windsurfing, the weather is central to the entire event.

Олимпиадные задания для учащихся 5-6 классов

I. READING - 20 баллов. На выполнение работы 15 минут.

I. Прочитай текст и найди правильный ответ из предложенных A) True (верно) B) False (неверно) C) Doesn't say (в тексте не сказано).

A bear is a large, heavy, strong animal with thick fur and a very short tail. There are several kinds of bears, black bears, polar bears, and grizzly bears. The brown bear lives in the forests and mountains of Northern America, Europe and Asia. Bears live alone; they never live in groups. Mother bear usually has from one to four baby bears. They are born in the winter and drink their mother's milk. They live with their mother for one or two years. Bears often spend much of their winter sleeping. Before winter they eat a lot of food. Bears can be dangerous to people.

- + 1. A bear has small eyes. A) True B) False C) Doesn't say
- + 2. Bears can be black. A) True B) False C) Doesn't say
- + 3. Bears don't live in Europe. A) True B) False C) Doesn't say
- 4. They live in groups. A) True B) False C) Doesn't say
- + 5. Mother bear has more than five babies. A) True B) False C) Doesn't say
- + 6. Baby bears are born in the winter. A) True B) False C) Doesn't say
- + 7. Baby bears live with their father. A) True B) False C) Doesn't say
- + 8. Baby bears hunt with their mother. A) True B) False C) Doesn't say
- + 9. Bears eat a lot before winter. A) True B) False C) Doesn't say
- + 10. Bears are never dangerous. A) True B) False C) Doesn't say

II. USE OF ENGLISH - 20 баллов. На выполнение работы 15 минут.

Лексика и грамматика

1) Найди обобщающее слово для каждой строки (5 баллов)
a) weather, b) season, c) months, d) sports, e) family

- + 1. a: rainy, sunny, warm, snowy, cloudy.
- + 2. e: mum, grandma, dad, grandpa, brother.
- + 3. d: volleyball, table tennis, hockey, football.
- + 4. b: winter, spring, summer, autumn.
- + 5. c: December, June, August, September.

2) Выбери нужное слово. Запиши его. (6 баллов)

- 1. Dogs like / likes meat. likes
- 2. I have got many / much friends. many +
- 3. Do / Does you drink milk every day? does -
- 4. Is / Are you a student? Is -
- 5. We don't / doesn't go to school on Sunday. doesn't -
- 6. Giraffes are tall / taller than horses. are tall -

+ 3) Выбери правильный вариант ответа (1 балл)

How are you?

- A) I am seven
- B) I am from Russia
- C) I am fine!
- D) I can fly

+ 4) Дополни предложение, выбрав одно из слов под соответствующей цифрой (1 балл)

My father's brother is my _____.
A) uncle B) sister C) aunt D) daughter E) grandmother

+ 5) Выбери лишнее слово в логическом ряду (1 балл)

- A) frog B) fox C) bear D) tail E) cat

+ 6) Выберите правильный вариант написания цифры 9 (1 балл)

- A) six B) nine C) seven D) four

7) Установи соответствие между "цифрами" и "буквами" (5 баллов)

+ u 1. 66	a) six
+ a 2. 6	b) sixty six
+ r 3. 16	c) sixty
+ e 4. 606	d) sixteen
+ c 5. 60	e) six hundred and six

III. Writing. Умеешь ли ты писать по-английски? Заполни анкету о себе. (10 баллов)

На выполнение работы 15 минут.

- + 1. Name Egor
- + 2. Surname Tkachenko
- 3. Home address 202
- + 4. Date of birth 21st January
- + 5. Family Mom, brothers, sister, dad
- + 6. Favorite subjects Maths
- + 7. What are your hobbies? play and football
- + 8. Favorite sports football
- + 9. Do you have any pets? cat
- 10. Date 20 September

4/15/5

READING

Time: 30 minutes

1. Прочитайте текст. Для предложений 1-9 выберите ответ (A) True, если оно соответствует содержанию текста, и, ответ (B) False, если оно не соответствует ему, ответ (C) not stated, если оно в тексте не упоминается.

A Trip by Plane

An American farmer wanted to make an air trip. There was an airport close to his farm. So one morning he came there to ask if he could make an air trip.

"You see," he said to one of the pilots, "I have never flown before, but I would like to." The pilot told him that the price of the trip was 10 dollars for a ten-minute trip. "Oh, it's a dollar a minute," the farmer said. "Can't you reduce the price?" The pilot thought for a minute and then said, "I won't take any money if you don't say a word during the whole trip." The farmer agreed.

"By the way," said the pilot, "you may take your wife too." The farmer was happy.

The next day at three o'clock the farmer and his wife arrived at the airport. Soon they were up in the air. The plane flew at a high speed, it went up and down very quickly, but since the passengers didn't say a word.

"You are brave people," said the pilot. "I thought you would be afraid to fly."

"Well," said the farmer, "I am glad, I will not have to pay for the trip, as I didn't have to say a word, but I wanted to speak to you when my wife fell out of the plane"

- + 1. The farmer didn't like the price of the trip.
 A True B False C Not stated
2. It was a trip on the ship.
 A True B False C Not stated
3. The farmer decided to take his wife because it could make the price of the trip less.
 A True B False C Not stated
4. The price was 10 dollars for each minute.
 A True B False C Not stated
5. The passengers kept silent when they were in the air.
 A True B False C Not stated
6. The farmer's wife was quite well after the trip.
 A True B False C Not stated
7. The pilot agreed to reduce the price.
 A True B False C Not stated
8. The pilot thought that his passengers were very brave.
 A True B False C Not stated
9. The farmer and his wife arrived at the airport in the evening.
 A True B False C Not stated

USE OF ENGLISH

Time: 30 minutes

Подбери к глаголу в скобках нужную форму (4 балла)

- + 1. Ann and Nick _____ (discuss) this problem now.
 a) are discussing; b) is discussing; c) discuss
2. Mary must _____ (finish) her story.
 a) finish; b) to finish; c) finishing
- 3. This photo _____ (take) yesterday.
 a) took; b) was taken; c) is taken
- + 4. Tom _____ (not drink) coffee for breakfast.
 a) do not drink; b) does not drink; c) does not drinks

Выбери Do или Does (6 баллов)

- + 5. Do you study music at school?
 + 6. Does she sing in English?
 + 7. Do you play the trumpet?
 - 8. Do musicians practice every day?
 + 9. Does Victoria play the guitar?
 + 10. Does he live in England?

Выбери правильный вариант ответа (3 балла)

- + 11. The Volga is ... river in the territory of Russia.
 a) long b) longer c) the longest
- + 12. ... birthday is it next week?
 a) Whose b) Whom c) Who
- 13. George plays ... the violin rather well.
 a) - b) on c) in

In this area, this storm was judged as the most severe for 13 years- since 26-th of December, 1998, with wind speed exceeding those of the recent storm of 8-th of December, 2011. Very strong winds were also experienced across much of England, Wales, and Northern Ireland. This storm was followed by a further extremely windy period from 4-th to 5-th of January, 2012 – with further damaging winds across northern and eastern England. These storms followed a particularly turbulent time of weather from late November to mid- December.
- F. The idea of creating a weather forecast using dynamic equations was first put forward by English mathematician, Lewis Fry Richardson, in 1922. He realized the dynamics of the atmosphere could be

modelled by doing thousands of equations, thus being able to predict the weather. In a pre-computer age, however, the only way to apply his numerical method was by hand. He estimated it would take 64,000 people to perform the calculations needed to make a forecast in time for it to be useful. While this wasn't practical, Richardson's theory formed the basis for weather forecasting as technology improved.

- G. The weather can have a huge impact on sports – from cycling to surfing, cricket to beach volleyball. As the UK's national weather service, we're always there when it matters, applying our science so that people can make the most of the weather. Many sports are affected by the weather in some way and conditions are important to athletes and spectators alike. Sometimes the impact of weather on sport is clear for all to see. It can help or hinder – headwinds make running and cycling harder, while tailwinds help push us forward. Some world records are invalid if set under certain conditions. Most of those participating in indoor sports like squash or badminton aren't too worried, but for sports like hockey or windsurfing, the weather is central to the entire event.
